

This Bill may seem reasonable as described, but in the end, when a perfectly viable person attempts to buy a gun and is placed in a que with no end in sight, this is a direct violation of the 2nd Amendment. As an example, I am trying to buy a hunting rifle right now. I am in the que and the store tells me there may be no end to the wait. However, I am a law abiding citizen with a perfectly clean background. I am a retired US Air Force senior NCO. I am a concealed Handgun License holder. My driving record is absent of violations. I follow the law, but my rights are being withheld. This Bill will affect persons all around our county who are law abiding citizens and there is no remedy that is acceptable being discussed! This Bill stands in the way of my rights and no American citizen has the authority override the rights of other American Citizens who follow the law.
