

Surely this past year with the Coronavirus has shown us that we need to invest more in our infrastructure to make cycling in this city safer and available to all? I ride everyday and see how much we can do to improve the bike routes around town. I feel I put my life at risk just for the simple joy of riding a bike. We can do better and if we did, more people would feel comfortable riding a bike. The impact of taking citizens out of their cars and improving the air quality in the city would be huge. The climate crises is real and we need to be bold to make changes to address this existential threat.

Thank you.

Mark
