

What are you all thinking!?! Anybody who has anything to do with the language and amendments of this bill and anybody who supports it needs to pull your heads out of your butts. This bill will hurt already suffering businesses and families during the pandemic and is about as stupid as it can get! Taxing Construction, Forestry, Agriculture, and all other off-road terrain vehicles to fund engine upgrades in metropolitan areas just does not make sense!!! We are still reeling and dealing with a pandemic and the last thing that should be happening is a bunch of brainiac liberals and progressives wanting to tax the crap out of everybody and continuously creating bills and forcing them on us that target and have disastrous effects on lower income communities, rural communities, and small business owners. How about you lot of fools actually do something constructive with your time and our tax money that you already have plenty of and help us Oregonians and American citizens out. Stop getting in the way of American and economical progress!!

Sincerely,  
Chad Kernutt
