

RE: HB 2674 Bonnie Watt

Stand OPPOSED to this amendment which taxes, and taxes. Please do not impose this tax on the people, fueling and leasing industry, which effects so many other levels of agriculture, construction and small independents in an already trying time (if you are still fortunate to be open) during COVID-19 mandates and recovery. Stop hurting the people and work to correct your own state budgets and operations before you go looking for a bleeder to kill. WE are hurting already. It is especially unfair to saddle locals in the wake of COVID-19. Is this really about "engine emissions on our environment" that legislature thinks more money will help?
