

I am a logger from Douglas County who just lost 500 acres of 25 year old reproduction from the devastating Archie Creek Fire. Why raise taxes during a pandemic, after devastating fires and snow storms, and during other business disruptions that rural Oregonians are and have been going through. Furthermore, off road diesel is not being burned in urban areas and additional taxes on agriculture are a burden on those raising the crops we all rely upon for our daily lives. Give tax increases and costly regulation a long term moratorium. Your tax receipts have never been higher as a result of all your earlier burdens you have placed on us that never go away. Give IT A Rest!!!!
