

Visions LLC is a statewide agency supporting older adults experiencing a neurocognitive or physical disability. We provide Behavior Support Services as well as consultation and have participated in multiple smaller contracts and some exciting grant work. We have had the pleasure of partnering with OPGC more than once during our High Risk Team Meetings in Central Oregon and have valued their input and expertise. However, one thing has been abundantly clear -- there are not enough public guardians to serve the population that needs them. Oregon needs to see this expansion through, in order to best serve our most vulnerable population.

Please reach out for additional input, if desired.

Kindly,
Brittanie Matti
