

We elected you to take care of your district. We have a rental in Central Point, Oregon. Our tenants have NOT paid one dime since June 2020. He is employed, but states he has had his hours cut back so he can't pay the rent. He has not offered any "amounts" even to show good faith. All he supplied us with was a letter certifying he can't pay because of Covid.

We are a retired couple and live off of this income from the rental. Or we did. Now all of our charge cards are running up a large balance which we never kept before.

We were interested in the 80% payback from the state and have heard no word on how or when to apply for that. This renter is just using the system and has no intention of paying. Wouldn't you love to live rent free for a year ???

You are not helping your constituents in Southern Oregon. Do not pass this Senate Bill 282. How many more people are you going to hurt by doing this. I'm sure the foreclosures will start adding up as soon as the banks want their mortgage money due.....
