

February 3, 2021

Representative Pam Marsh, Chair  
House Committee on Energy and Environment  
Oregon State Capitol  
Salem, OR 97301

**RE: HB 2062 – SUPPORT**

Chair Marsh and Committee Members:

Climate Solutions is a regional non-profit working to accelerate clean energy solutions to the climate crisis. Founded in 1968, Oregon Environmental Council (OEC) is a nonprofit, nonpartisan, membership-based organization advancing innovative, collaborative and equitable solutions to Oregon's environmental challenges for today and future generations.

We are writing in support of HB 2062, a bill that is good for the climate and for the pocketbooks of Oregonians. The Oregon Department of Energy estimated that the appliance efficiency standards in this bill can - in the year 2025 - result in annual savings of 76,500 metric tons of CO2 and over \$35,000,000 in savings on utility bills. By 2035, the annual greenhouse gas reductions associated with the updated appliance standards would be 132,500 metric tons, and Oregonians would save over \$101,000,000 on their utility bills. At a time when Oregonians are facing multiple crises, not the least of which are the climate and economic crises, **these appliance efficiency standards are a win-win for Oregonians.**

In addition, future periodic updates to appliance efficiency standards will deliver even more benefits. This bill provides ODOE with a clear pathway to make those updates. Unlike many other states, ODOE's updates currently follow an added step of needing approval by the Legislature. Appliance efficiency standards are an ever-evolving area that will continue to require updates as more efficient appliances become available. As a result, ODOE should have a clear pathway to update them. It's been over six years since Oregon's appliance standards were last updated. We cannot afford a gap like that in the future for Oregonians to miss out on needed emissions reductions and cost savings.

Sincerely,

Zachariah Baker  
Oregon Policy Manager  
Climate Solutions

Nora Apter  
Climate Program Director  
Oregon Environmental Council
