

The State of Oregon needs to adjust their priorities. For example, the state has yet to fully pay unemployment benefits to some workers after more than a year. The state economy is also still in disarray because of Governor Brown's unconstitutional executive actions shutting down the state because of a sickness with over a 95% recovery rate. This is being enabled by a stacked state Supreme Court appointed by Brown. This should be the Legislatures priority, getting the state reopened, people back to work, and lives back to normal. Instead, they're proposing laws that allow a bureaucratic state agency that has already proven themselves unable to handle the existing requirements of prior bad & unnecessary legislation (Oregon doesn't need to have OSP run background checks & should be using the fed NCIS system at no cost to the purchaser). The entire background check system imposed by the state is nothing more than an income generation mechanism & way to deny people their rights. OSP has proven their ineptitude in the fact that there are Oregonians out there who have had their background checks delayed for no reason as they're not prohibited, but OSP won't process the check. There's currently little recourse to challenge a delay & this bill will allow delay of Oregonians ability to exercise their constitutionally protected rights indefinitely with no recourse. The State of Oregon has proven inept at all that they do and should not be given anymore power to violate Oregonians rights. No other constitutionally protected right is attacked with such disregard & outright insanity as the right of self preservation & defense. This bill is dangerous as it gives the state more power with little to no restrictions. It seems that Oregon politicians, as well as nationally,, particularly the Democrat party, have forgotten that they work for the people. Not lobbying & special interest groups. It's very apparent that the Democrat party of Oregon is beholden to outside influence rather than the constitution & their constituents as evidenced by their power hungry proposals. This bill needs to die. The ability to complete a transfer after a certain delay period is in place so that constitutional rights can't be denied arbitrarily or by bureaucratic chaos, ineptitude, and outright law breaking. This bill allows the state to do just that with no resolution mechanism. More & more voters are starting to get fed up with Oregon's Democrat Supermajority unchecked spending, rights violations, taxes, lockouts, etc., & may soon lose their Supermajority. Unchecked power can only last for so long. Stop the madness & let this bill die.
