

This bill will kill many small businesses, make the water more unsafe for my wife, kids and I. The current level of police on the water is not enough to enforce silly laws that aren't biased on science. This bill is similar to when people buy property next to an airport then complain about airport noise. My message to people living on the waterfront that support this bill? MOVE. Water sports aren't going anywhere, this will only serve to tie up limited police that are on the water.
