

I overwhelmingly support this legislation. This is LIFE SAVING legislation and a moral imperative. Sweeps kill and I have seen how they also destroy established communities, can traumatize our unhoused neighbors, and allow the city to steal belongings and harass folks if they feel like it. And they do this all to an ineffective end - the city contracts sweeps that force residents to move from one camp to another location and then they come in and sweep that location. It is damaging, extremely senseless, and deadly. We have a human duty to stop criminalizing people who are living outside and to stop not only allowing but encouraging and sanctioning certain humans to harass other humans. I commend Representative Winsvey Campos for introducing this legislation and urge you with the utmost conviction to support it.
