

Every Oregonian deserves the right to exist in public without fear of harassment or harm. We are experiencing an epidemic of unemployment/underemployment, food insecurity, and inaccessible housing that has only been exacerbated by the COVID19 pandemic. This bill is a step in the right direction in protecting our most vulnerable community members. We must decriminalize the existing of the unhoused. I support HB 2367 and hope it will lead to a future where all people can thrive.
