

I own two properties in Eugene Oregon and pay over \$10,000 in local taxes. Dislocation and sleep deprivation, as well as a refusal to meet essential human needs are considered torture. I am made sick that my tax money is used to support systems that torture my fellow human beings. My City seems to only work for people who own real estate downtown and for the sake of property values. They seem to have no moral conscience. I'm repulsed by their lack of humanity and values. They must be regulated. However, the phrasing "objectively reasonable" in this Bill gives me pause and grave reservations in the interpretation of your Bill.

Thank you,
