

It is not enough that you have failed to address the armed thugs carrying guns on our streets, whom this bill will have no affect on. But you wish to deprive me of the only evener I have by forcing me to lock it up. Doubtless you will come up with a super fix after said thugs have killed me and stolen any weapons that you graciously allow me to own. It will be poetic justice when they turn them on you as they most certainly will do.

If you cannot come up with a way of encouraging law and order without stealing private property. Then you should let those of us who can do it. I do not desire anarchy but HB2510 is clearly on the road there one way or another.

It is wrong to take the liberty of the citizens by majority vote.
