

1. Paying overtime is unfeasible for Siri and Son Farms. Because of NAFTA we must compete with the very low prices of Mexico grown product.

2. Hiring more skilled farm workers to avoid paying overtime is out of the question. Every year we spend endless amounts of time and money to recruit more labor but we still come up short.

Result of HB 2358: Siri and Son Farms will be forced to reduce their production due to the lack of skilled labor and financial ability to pay overtime.
