

I support all efforts to bring organic farming forward in all the ways defined by this bill. I lived in Lane County for 35 years and watched this industry steadily grow. Organic farming benefits people, soil health and potentially the climate too. I am a registered nurse and am aware that increasing plants in the diet may indeed decrease the incidence and severity of chronic diseases which is way too prevalent in our state and country. Vote yes on SB 404 for so many excellent reasons!!!
