

I am a Home Owner living at 11990 SW Riverview Lane in Wilsonville with 200 feet of Upper Willamette river front property and have a 70 foot gangway and a dock. The winter storms over the years that raise the water level by 40 feet are the only times I've seen any problems with my river bank, and I totally disagree with the statement that wake boats, or families towing tubs in front of my home are hurting my property.

Thank You, Ken and Christina Guerins
