

Why in this day of age are you wanting to restrict public right away. Rivers are public usage for traveling for business and for fun. Why is one persons right greater then someone else's . This always happen where its not a "Majority" rules but only the small well funded get to dictate what happens. Oregon used to be a great state until you started to regulate everything. I can't even use a Paddle Board on Public Water way because.. you guessed it over regulations. Every thing you are doing has not helped the entire state. We are supposed to work as one, but then again people the people in charge are in Portland, Salem are calling all the shots for all of Oregon. Stop all this over regulation.
