

I have been living in Lane County since 2014. Since arriving here I have been sourcing local raw milk, cream, butter and cheese products from local farms by joining a herd share for milk, cream and butter at some farms or buying certain raw products like Goat's milk and various raw cheeses from local and state Oregon based stores. I don't understand why there is discrimination between goat, sheep, cow's milk and other dairy products being sold in stores and would like to be able to buy ANY raw dairy butter and all other raw dairy products at the stores I patron. I am a health coach and have studied the health benefits of unpasteurized food and beverage products and know that all nutrients are burned out of food and beverage products during the pasteurization process. I support food and beverage producers that support good health. Please pass HB2612. Thank you.
