

This bill does not have any actual scientific study behind it, as you guys say in the bill if it is past then you will START the scientific study behind it. That's not how laws and rules are put into place. All boats in general make wakes and wakes that are the same size as the ballast boats are made by Yachts and even Jet boats. I have seen it myself. If this bill is past you are RUINING a family activity that ANYONE can partake in and enjoy on the water. That is not okay for a PUBLIC waterway. It is actually immoral. Also going back to the original bill in 2018 that was put into place for the surf zones, you FORCED everyone into 3 Miles of the river in a 25 miles stretch. And there was a massive increase of boats sold in the last 2 years, so of course the river will have more waves on it. That is common sense. The river houses and docks in that area would not be complaining if you would have kept the river open in all areas to ALL boaters, meaning everyone would be more spread out and actual be able to go wherever making the waves decipate throughout the river not just in the Newberg Pool. Also the Home owners docks are actually on a PUBLIC water way and in the way of boats being able to use their boats anywhere, so why not take the docks away? Then they won't complain and cry. Oh wait, its because they have money and you only will listen to people with money. Erosion is a natural thing that happens when a river is moving at 10-15 miles per hour in the winter and is fluctuating 15-30 feet each year while it is having a current that fast. Trees fall, hit the bank and cause erosion. There is no scientific study behind any of this, it is just a group of scientist that you had sign something. It is very obvious. You are going to ruin many jobs in the PNW for many people, and you're okay with that? Immoral. The very few people that want this bill to pass are the people that don't know anything about boating, the boats have been over 4000 pounds for AT LEAST 15 years. Yet you guys just think it is a problem in the last 2 years? Where is the logic? Thanks for reading and I hope you give more time to think of the correct thing to do with this bill and not just listen to the small majority of people that want it to pass.
