

Public testimony

I Oppose HB-2510 on the grounds that it is not the government's job to dictate what we do in our homes and how we store our firearms. I believe that each home or setting will have different needs in this manner.

Please focus on the Mental Health Crisis, opioid/drug epidemic we have in this state and the violent crimes and suicides will go down.

Micromanaging law abiding citizens will not affect your stated concerns of this bill.

Thank you for your service.
