

STRONGLY OPPOSE

Once you go down this path and start paying people that were never slaves from people that never owned slaves, the hole gets deeper!

What about the Japanese held in FEMA camps? what about families separated because one wasn't a citizen? What about children that got ADHD from vaccines? What about the people indebt because the Governor closed their business?

Reparation is a form of revenge against people that didn't have anything to do with their poor feelings.
