

I am in strong support of this bill because I believe all benefit from housing our neighbors. Aside from the (to me) obvious ethical obligations to respect the right to basic human needs, this bill supports the most economic path to a successful society. The current path we are on is expensive to governments, NGOs, and communities, but still includes much suffering by those left with no option but to live on the streets. Please pass this bill and give us all a better chance at reuniting our communities that have been fractured by the housing crisis over the past several years and are at risk of breaking completely!
