To Whom it May Concern:

I am writing to you today to ask for your support of HB 2164, **Cover All People**.

Washington County Kids is a nonprofit organization dedicated to ensuring access to quality out of school time (OST) programs that equip Washington County children for success. Unfortunately, many of the families of the children who attend these programs do not have adequate health coverage. If the adults in the family do not have adequate health coverage, it means the children who receive healthcare are still at risk of unwanted exposure to diseases and not receiving adult care and supervision due to illness of caregivers.

We support the **Cover All People** pilot program which would provide health care coverage to medically underserved people including undocumented adults, DACA recipients, legal permanent residents and young adults who age out of Cover All Kids. Only Oregonians under 138% (190% for pregnant women) of the poverty level would be eligible.

Cover All People would ensure that recipients receive timely and preventative healthcare. It would help achieve healthy adults and healthy communities. **Cover All People** would reduce healthcare costs borne by taxpayers by extending authority to cover a critical population. Increased access to healthcare via **Cover All People** would result in a stronger economy, improved health outcomes and healthy communities.

As you know, Latino/Latina/Latinx/BIPOC Oregonians are the backbone of our economy. Overrepresented in the ranks of essential workers, particularly in Washington County, these taxpayers take much higher health risks to keep our economy strong, especially during the current pandemic. Expanded healthcare access is linked to obtaining and maintaining employment, which benefits the economy in general. Health insurance coverage also reduces individual debt (medical and non-health-related), allowing individuals to spend more in the economy. Lastly, healthier people are more productive in the workplace.

Healthcare coverage is a tool to help ensure better care outcomes among communities who are medically underserved. In geographic locations reporting demographic data, communities of color are bearing a disproportionate burden of COVID-19, and are being infected - and dying - at a higher rate compared to the white population.

We hope you will support HB 2164 - **Cover All People** and help reverse the trends outlined above. Thank you very much.

Sincerely,

Katie Riley, Ed.D.
President
