

Today I am writing to ask for your support of measure HB 2970.

Myself and many other estheticians in Oregon have based our skincare practices around non-invasive, perfectly safe devices that we received in depth training in. Many of these devices, such as LED and microcurrent, are even available for the non-professional to purchase and safely use at home.

This bill would allow us to continue to use those tools, while keeping devices such as lasers, which require additional training, safely out of our scope, only to be used by advanced estheticians. If this bill does not pass, I fear that my business, and many of my fellow practitioners' businesses, may close. In reality, I estimate that if this bill does not pass, and we are prohibited from using these tools, myself and others will lose at least 30K in income next year.

The personal services industry has suffered dearly during the pandemic, from being forced to close, and then to reopen with many new costs and heightened Covid protocols. Many of our businesses are barely hanging on, and having our perfectly safe tools taken away from us would be detrimental to our livelihoods.

Thank you for your consideration.
