

Hi my name is Brenda Satchell,

I have been an Aesthetician since 1990 in Oregon. I want you to know without your support on HB2970 and HB2971 thousands of Oregon Aesthetician will be forced to close their businesses. I am one of those businesses.

I have used Galvanic current, Micro current, Microderm, Light therapy (LED), Skin scrubbers, Ultrasound and more. All of these " DEVICES" have been used for more than a decade and some of them for over 30 years safely with no concerns. The Oregon Board of Cosmetology can support this fact. There is no reason to remove these types of services from Aestheticians. It is a big mistake that can impact so many people financially. I will have to close my business if you do not support HB2970 & HB2971. Eighty Five percent of my revenue is generated by the use of Microderm, LED and Micro current which is safe and effective. I have worked so hard for so long to build my business, please support us.

Thank you Brenda Satchell
