

I am a Central Oregon local, and consumer of local, pasture-raised goat and lamb meat exclusively. My health depends upon the quality of product grown and raised by folks I personally know here and whom I am willing to pay extra for their meat. The pushback dates for their processing for the coming year is several months ahead. Support of this grant will make a big difference for our local meat-producers as well as my family and many families I know who depend upon them for our health and wellness. Thanks.
