

I strongly oppose this bill. We choose to pay out of pocket to send our children to private school even though public school is covered under our tax dollars due to the fact that we disagree with the ODE curriculum indoctrinating our children to their content decisions. We want control of what is taught to our children and private schools afford us this option. This bill removes this option. If this bill passes you will end private schools, homeschool rates will skyrocket and public school funding will plummet. All we are asking is to for our right to have a choice of what our children are learning. Public school does not afford us this choice and private school does. ODE needs to stay out of the private sector education, it is not their place to intervene there.
