

We can no longer allow a few to act like children when there is work to be done just to try to make points that are not even what their own districts are in need of or even in understanding of what they are trying to act against or for. The majority of Oregon has spoken and the majority's voice is being denied and silenced by the actions of the few and indignant who would rather act like a few spoiled children rather than adults who could be stepping up to the table and working for true reforms and actions that could be helping their communities. The need for action is long past due, I hope you past this and move Oregon into the 21st Century. Thank you for your time.
