

I vehemently oppose this bill. Oregon has shown themselves incapable of following any kind of science in getting children in schools this year, and yet somehow the legislature wants to in essence make private schools public! Families have flown to private schools in this year because of any lack of education by public schools. To then pass this bill is to make a monopoly of public education and is a slap in the face to Oregonians. Families deserve a choice and you are trying to take this choice away by exercising control over what is being taught, hours of instruction, etc. It's reprehensible and I will personally make sure I know every person who votes for this bill and publicize it far and wide so that everyone can see who actually cares about children in Oregon.
