

I am a concerned grandparent and I am against this bill . People should have the right to choose a private school education without the state trying to regulate . People that send their children to private school are paying for that type of schooling because they value the education that their children will receive . I don't want the government telling private schools anything . I feel the public schools are a complete disaster for our kids and all they do is try to indoctrinate our kids into radicals who hate our country .

Please keep your nose out of private schools . Also if your so concerned about private schools then I suggest that the money that is spent on a child in public school should be given to a child in private school as well . Don't punish the parents and the kids of private schools .
