

I appreciate everyone's effort put into today's meetings. We are here together to make the future brighter and better for all of our students. TAG students are from all races, ethnicities and genders. I believe that this study on instruction provided to TAG children will help shed some light on this diversity and bring us closer to having a better system that meets the needs of all TAG children and their families. Having better supported TAG children who have appropriate instruction will give us more graduates who can be successful and make the world and our city a better place. TAG children deserve to have FAPE and this study will help pave the way toward that.
