

It is unbelievable that in a state that is associated with Beavers, and uses their name and/or likeness for sports teams, towns, our flag, etc. they do not have greater protections. All animals should be better protected, but it seems most shocking that an animal we essentially pretend to regard, is not. Beavers must not be allowed to be killed for "intruding" on land that is theirs because it's inconvenient for humans. Protect the Beavers in the Beaver State.
