

I support. The Rogue River needs these hatch boxes and programs like this to build fish numbers in the river. I hear stories of the good ole days and I never got to see much of those fishing days. I'm lucky if I catch one fish floating from white horse park down river all day. We need to change something because what we're doing now and what we have been doing the last ten years isn't working. I just want more fish in the river so maybe someday my son can have better days than I've had on the river the last ten years. I also think this program will boost economy's in small town. More fish in rivers brings more money from out of states to ODFW.
