

I absolutely support this bill! Between river recreation, dams being taken out, drought, increased fishermen population, and so much more goes into the population of our fish on the rivers. Since I moved to Grants Pass 2 years ago it has just been heart breaking to hear about how diminished the fish population is getting and how nothing is being done about it. If toys like 80 passenger jet boats are going to be talked about and voted about as a possibility for a river option, then we should simply be ashamed that something like hatch boxes would even be voted on. Get this passed immediately and help start bringing back the fish!
