

Our public schools are not what we the people want Here is La Grande Oregon our schools teach alternate life styles, anti belief, and socialism. We are responsible for our children and would prefer to teach our children our own believes . Your social attitude is not in line with my beliefs, I believe in the sanction of marrage between a man and a woman, you have destroyed that, I believe in god, That is no way???? If your schools feel it is necessary to teach grade scholars about sexual preference , I disagree any child under 15 should not have a preference, you need to leave that to the parents. Yes I do think I am wright. stop teaching your socialist agenda and I will support you continue with your minority opinion and I will fight you.. Continue with your agenda and I will continue to support private schools over you. Get your economics in order and stop putting teachers on a pedestal. Its is just a job not warranting the level of support you give them. Our worthiness is not based on our employment, despite your believes just because I work in the private sector does not make me worthless. Private schools can operate on the budget they have not hold us hostage for more money every year. Using my children to blackmail me for money is illegal unless your the government. Private schools can not do that to us nor would they.....Yes you see a difference between the teachers union and the government we don't Neither of you can balance a budget or operate within your specific field. Us civilians have no choice but to make due with our lives
