

As a female and knowing females who may not have the money, or live in households who appear negative to having female hygiene products, having this bill would help them out immensely. especially because you cannot stop the reason why these products exist. This is a very important matter to me personally because I am a person who will be affected with this as a female, it will make girls feel much more comfortable in a public school environment as they will not have to worry if they do not have products on hand, and will lower people sharing these products with each other which can have complications on their own.
