

As a parent of students in private school, I am supportive of their customized curriculum and flexibility over the last year of ever-changing restrictions due to COVID-19. I also support the faith-based curriculum as part of our expression of worship as we raise our family. I believe this makes for better students and citizens of our state. I am opposed to any measure that would restrict or limit that education to state requirements as set by the Board of education. Please reject SB 223. Thank you.
