

I oppose SB 262. Last session they were Senators who denied quorum. I, along with most of their constituents supported them for doing that. Some people said they weren't doing their job, but actually they were doing their job and representing their constituents well. Because they were doing their job they should be paid. This is another bill that is being introduced that seems to only be about revenge and punishment for what happened last session. Please vote no on SB 262.
