

I fully support HB2970

My wife is a Esthetician's , she has worked hard for her license and scope of practice . To take it away is wrong , she went to school for this and now it can be taken away because of what ? A power struggle? Miss used words

To take it away means she was not trained to do what she dose , not capable of doing what our state licensed her to do , not capable to teach what is required by our state to graduate as a esthetician's.

I support this Bill
