

There is no reason for this action by the Senate Committee on Education to impose themselves on the curriculum of Private schools. In essence, by having this control Private schools would no longer be "private."
This would limit educational choice for families of 50,000 Oregon school children choosing non- public school education. Parents have the right to choose their children's education via the 1st and the 14th amendment. Restricting the choices; creating a new layer of unnecessary governmental bureaucracy; requiring money, time, and attention away from private schools that run tight budgets as is.

The Private system is working, and thriving as evident this past year given covid, where they were able to be flexible and make adjustments so their students could attend in person if so desired.

Please see recent Wall Street Journal Article applauding Private schools this past year-
