

There were many of us at Committee in the Oregon Legislature in 2018 to oppose NuScale and it's relentless end runs on the will of the people of Oregon. We stopped it then. The people of Oregon through hard fought ballot measure and the relentless work of anti-nuclear activists have clearly stated their will: NO MORE NUCLEAR RADIOACTIVE DEATH MACHINES in Oregon. All the other testimony, written here at this time, vehemently oppose nukes with multiple valid reasons. Enough. Must we pass another initiative that outright bans nuclear forever in Oregon? Must the Legislature continue to keep coming back and attempting to sneak nukes past us? This is NOT democracy. This is private-money Plutocracy of the worst, most deadly kind.

If Oregonians were given the opportunity to vote between energy sources we all know well designed solar, eco-safe wind and wave, would be the CLEAN desired replacement for carbon and nuke unavoidably toxic sources. Tremendous private and public monies are being exhausted in subsidizing and promoting carbon and nukes against the will and common sense of the people. No matter what the Legislature does the People in majority numbers will oppose nukes in any form, by any trickery and will stop it dead in it's tracks. Y'all can save yourself a lot of trouble by snuffing out any deadly nukes nonsense now, and every moment after now.

Thank You.
