

Chair Marsh, Vice-Chair Helm, Vice-Chair Brock Smith, and Members of the House Committee on Energy & Environment,

Thank you for the opportunity to testify in support of House Bill 2021, 100% Clean Energy for All. I am a second-grade teacher in Beaverton - I teach in a dual-language program to promote educational equity for students whose families speak Spanish. I am also involved in various efforts for educational and social equity. However, I am also aware that I am teaching students who would graduate high school in 2031 - the year after the deadline to cut carbon emissions.

I urge you to support House Bill 2021 so that Oregon communities are sure to benefit from the transition to clean energy. House Bill 2021 can help us to ensure that the communities in Oregon that are struggling the most from the pandemic and its economic impacts, extreme weather events, and wildfires are the same communities that benefit from clean energy. That is why the Oregon legislature must take action.

As I stated, I teach young students, students who do not have the right to vote and are actually too young to even quite understand the politics of global warming, climate change and environmental racism - and yet are the most impacted by it. If the adults in their society do not take appropriate action now, they will come of age in time for an enormous increase in natural disasters and climate refugees, which will in turn lead to the criminalization of climate refugees, as we saw in Medford after the devastating fires that consumed the west coast. If the state of Oregon wants to educate its youth and prepare them for adulthood, they should also be securing a livable future for youth.

We can build a strong, resilient, and clean energy economy in our communities by ensuring that Oregon's 100% Clean Energy Standard includes:

Strong labor standards that ensure clean energy projects hire local, pay the prevailing wage and provide good benefits, and reserve opportunities for apprenticeships.

Good incentives for community-based energy projects such as solar plus storage that increase energy independence, affordability, and disaster-resilience.

Provisions that prioritize benefits and avoid harms to environmental justice communities including BIPOC (Black, Indigenous, and people of color), low-income communities, Tribes, and rural and coastal communities.

We have the opportunity to increase local community ownership of energy, job opportunities and economic development, and the health and safety of communities throughout the state. Globally, the burning of fossil fuels was responsible for 20% of deaths in 2018 and pollution from facilities like gas-fired power plants leads to worse outcomes of COVID-19. By setting clear targets for cleaning up Oregon's electricity and supporting community-based energy projects and good jobs for local communities, we can seize the opportunity of clean energy to help rebuild from today's many crises.

Thank you for your time and for the opportunity to testify in support of House Bill 2021. Please support a strong 100% Clean Energy Standard with good jobs and community-based energy projects for Oregonians.

Sincerely,
Rina Miyamoto-Sundahl
