

I am writing to urge your support for Bill HB 2728. The act of killing coyotes for sport is heinous and disgraceful. These senseless slaughter fests do nothing to curb the population, and only work to reinforce that killing animals for fun is justified. As we work towards being a just and compassionate society, we need to consider that cruelty towards animals in any form is an arcane and outdated model of behavior.

If necessary, there are other humane non-lethal techniques to help keep the coyote population in balance.

Please do the right thing and ban these killing contests.

Thank you for your consideration,
Taylor Talmage
