

Chair Marsh, Vice-Chair Helm, Vice-Chair Brock Smith, and Members of the House Committee on Energy & Environment, I write to support House Bill 2021, 100% Clean Energy for All. It is past time for every country, state and city to commit to combating climate change. Small measures 20 years ago may have been enough but they will not work to turn around a planet that will be unlivable for many in the next 50 years. We have a responsibility to act now. This bill will commit Oregon energy companies to make significant changes now. We all want good paying jobs in our communities and this bill will insure that the workers bringing clean energy to our communities will have those good paying jobs. I urge you to think of your grandchildren and protect their futures by signing this bill.
