

I support retroactive consideration of "good behavior" for any AIC who has been deemed by (either) their counselor, the commanding officer at their facility(ies), their counselor, their pastor ... or a composite of two or more of these responsible persons THAT the AIC has taken full responsibility for their offence(s) AND has proven by their behaviors to be responsible in their interaction with other AICs, officers, and others in charge of their care.

I support this bill being applied or considered for any AIC who has taken the initiative to procure education and counseling while incarcerated.

I support this bill being applied or considered for any AIC who has "solid" plans for employment, housing and family/friends' support upon their release.
