

Proud Ground stands in support of HB 3368 as Shared Equity Coops are an innovative way to provide truly affordable housing to lower income residents. They build community and showcase collective management and support while maintaining affordability for the future. We need every tool we can access to begin to meet the growing need for alternative housing units at a time that inventory is at a historical low and prices are continuing to rise. Please support this bill. Thank you for your consideration! Diane Linn, Executive Director Proud Ground.
