

Movie theaters are one of my favorite places to go, especially Canby's. It is one of the few places I genuinely focus on only one thing and am able to do nothing else. They are a place that keeps me connected to one of my oldest friends since we are regularly each other's movie buddy. Movie theaters, especially our local independent ones, are an integral part of our communities and making them feel like thriving, active places. We need to support them now, so they can once again be part of that heart again. I cannot wait to go back and sit in a theater with my friends and family and enjoy a movie on the big screen and escaping to another place for a while again.
