

Our son Owen (age 4) has experienced radical transformation thanks to the support he's received through ECSE. From the initial evaluation to the ongoing interventions he receives at home and in preschool, we are infinitely grateful for these services. This program helped us identify delays in social and adaptive skills, and also to find clarity with his autism diagnosis. At first, Owen was such a challenge to be around - constant tantrums, fear of new experiences, and limited willingness to engage in his classroom. The ECSE program has given us a map to understand our child, and coping strategies for the atypical way that he experiences the world. This week, after a school visit, we got a message from our provider that said, "Owen waited patiently and followed directions - I was so impressed with him." We now are able to see more clearly not just his challenges, but also his strengths. What a shift! Thank you from the bottom of our hearts for providing this service.
