

Madras is a small, supportive community. We cannot afford to lose another business or social outlet for our youth. The movie theater not only provides job opportunities to the people of Madras, but it also provides a "breath of fresh air". A chance to relax and let go of the world for a couple of hours. To enjoy a night out, or a safe place for our youth to meet up with their buddies. We need our small movie theater to survive this pandemic. We need a small sense of normalcy. Please support us.
